2. After the merge of the " Lebanese Enterprise for General Trade "with "Al-Nour Enterprise for Substitute Energy", the administration decided to restructure its organization chart as follows:

Commercial Manager- Personnel Manager- Sales and Marketing Department- Accounting Department-Training Department- Production Manager-Financial Manager-Purchasing department

- 2.1. **Specify** the appropriate type of organization chart for this enterprise. (0.5 pt.)
- 2.2. **Copy** this organization chart on your answer sheet. (0.5 pt.)

Fill the empty boxes with the appropriate terms (from the list above)

- 2.3. a- **Deduce** the type of the decision that the enterprise took; (0.25 pt.)
- b- **Specify** the economic consequence, for the enterprise, that might result from the merging operation. (0.25 pt.)

3. An individual decided to deposit an amount of **20 million m.u** in a bank in order to obtain a total amount of **28 million m.u** on maturity date.

Knowing that he deposited the initial capital at a simple interest rate of 12% : **(1.5 pt)**

- **Calculate** the number of months needed to obtain this amount using to the following formula:

$$I = C_0 \times I \times n / 12$$

4. An investor in the field of interior design has an offer from abroad to buy a new machine. The details of the offer are:

- Purchasing cost of the machine in the country of origin: **45 000 m.u.**
- Transportation and insurance cost: **3 000 m.u.**
- Installation cost: **2 000 m.u.**

The investor should pay directly half of the amount of the offer and the rest in two equal installments (payments), one per year. He expects to achieve equal annual revenues of **15 000 m.u.** during the period of 5 years.

Knowing that the annual interest rate is 7% throughout the investment period:

- **Show that** the cost of investment is equal to 50 000 m.u.
- **Show that** the present value of the annual income is 61 502.96 m.u.
- **Show that** the present value of the annual cost is 47 600.22 m.u.
- **Show that** the present value of the project is 13 902.74 m.u.

Do you advise the investor to adopt this offer? **(2pts)**

5. **Justify** each of the following statements:

5.1. Decreasing the value of the domestic currency (exchange rate) contributes in the increase of the economic growth rate. **(1pt)**

5.2. Applying the privatization policy leads to a decrease in public deficit. **(0.5 pt)**
(public budget deficit)

Choose one of the following sets:

First Optional Set: Analyzing Economic Documents (12 pts)

Document (1):

The Eastern Center for Strategic Decisions" published the minutes of the first debate, of February 19th, 2015, about the problem of unemployment in Lebanon, in the presence of economic and social experts. (...) (According to the World Bank) the facts and figures reflected the following situation:

- a- The migration of Syrian refugees constitutes an additional pressure on the Lebanese's labor market and it is expected that the active population increases specially the categories of women and the youth with a proportion of 35%.
- b- The rate of the Lebanese population that emigrated to search for better job opportunities is estimated to be 15% in the year 2010.
- c- The newly established enterprises act as the main engine for creating new jobs; however the proportion of their entry to the market is not enough in order to create job opportunities in a fast pace, due mainly to the poor business environment and the lack of political stability and the corruption.

3. Referring to the data given in document no. (2),
- 3.1. **Calculate** the result of the trade balance: **(1pt)**
- In 2012
 - In 2013
- 3.2. **Compare** between the two results (increase / decrease).

Document (3): A study about the Lebanese industrial sector in Lebanon:

A Study showed that the industrial sector lacks variety in its activities where 86% of the industrial enterprises are centralized in ten main branches.

The study also showed that most of the industries are small scale enterprises since around 78% of these enterprises employ between 5 and 19 workers while the enterprises that employ more than 100 workers constitute 3% only from total number of enterprises.

The yearly gross domestic product per worker was estimated to be around 8,208.7 U.S. dollars. Knowing that the food and beverages industry is considered as the highest contributor in the industrial production (25.7%). In addition, the Central Bank indicates that the share of the industry from loans reached 11.29% from the total loans granted in 2013; whereas 34.47% were granted to the services sector and 1.03% to the agricultural sector.
